

Djvon Simpson

Software Engineer · Full-Stack & Applied AI

Chicago, IL · 773.984.8986 · workdjvon@gmail.com · github.com/dsimp · linkedin.com/in/djvon-simpson-9341a186

SUMMARY

Full-stack engineer who ships production web applications and GenAI features, then stays with them through testing, debugging, and real use. Currently at SAP, supporting customer-facing work while shadowing an Agentic AI Engineer and a Success Plan Manager. Comfortable across React, JavaScript/TypeScript, REST APIs, SQL, and LLM tooling — and equally comfortable explaining technical work to non-engineers.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS · Frontend: React, Next.js · Backend & Data: REST APIs, Node.js/Express, PostgreSQL, Prisma · Cloud & Delivery: Git, Docker, GCP, Agile/Scrum · AI: OpenAI API, Claude, prompt engineering, output evaluation, agentic workflows · Strengths: ownership, debugging, documentation, customer communication

EXPERIENCE

SAP America | Chicago, IL · Intern, Services Sales · Feb 2025 – Present

- Support discovery and follow-through with sales, solution, and delivery partners; turn messy customer context into clear next steps.
- Shadow an Agentic AI Engineer on LLM workflows, tool/agent patterns, and how AI features are evaluated before customers rely on them.
- Shadow a Success Plan Manager on adoption, customer health, and how value gets delivered after the sale.
- Use AI tools as part of daily work — then review and verify output before it is shared.

Discovery Partners Institute | Chicago, IL · Software Developer Apprentice (Full-Time) · Sep – Dec 2024

- Designed, built, tested, and shipped full-stack applications in a small Agile team with code reviews and iterative delivery.
- Implemented React frontends, REST APIs, and SQL data models; containerized and deployed with Docker on GCP.
- Integrated LLMs into a live product, evaluated output quality, and fixed reliability issues before release.

SELECTED PROJECTS

Shift-Cover | React · REST APIs · PostgreSQL · Docker · OpenAI · github.com/dsimp

- Production GenAI application owned end-to-end: architecture, implementation, testing, deployment, and debugging when model or integration output failed.

Ghghost | Next.js · React · TypeScript/JavaScript · SQL/Prisma · OpenAI

- Data and AI web product with API routes, dashboards, and predictive/content logic. Focused on accurate data display and a usable user journey.

Manumit | React · Express · REST APIs · JavaScript

- Full-stack application with frontend/backend integration, JSON contracts, and systematic debugging across services.

EDUCATION

B.S. Computer Science · Western Governors University · In progress

Full-Stack Software Development Certificate · Discovery Partners Institute · 2024
